

## 770 GWC-III FORCE FLOW PACKER

Patented accurate scale far surpass the weighing capabilities of any other existing valve packer.

**Model 770 GWC-III Packers** handle a product range from fine powders up to 3/8" particle size with minimal product degradation. Field test results yield weighing accuracies of  $\pm 1$  oz. @ 2 sigma for many products. The rugged design and high quality components ensure maximum continuous production.

Key machine features of the 770 GWC-III include computer generated statistical process control charts, on-screen diagnostics, and a checkweigh/feedback scheme to automatically track product density shifts.

## Features:

- Proven patented mechanical scale system
- Power conditioning transformer
- Bag inflation circuit
- Filling tube cleanout with settable delay
- LCD
- Color video display
- Touchpad entry
- Dynamic bar graph and digital weight display
- Checkweigh/Feedback
- 16 bag weight history bar graph
- Statistical Process Control: X-Bar, range & sigma
- Simple graphic operator instructions
- Easy calibration
- Graphic display of dribble flow
- Pre-set operating programs for up to 15 products
- Auto zero
- Auto shutdown
- Bag discharge delay
- Off-weight alarms
- Help screens

## Optional Equipment

- Low pressure blower
- Operator seat and empty bag rest
- Automatic start
- Automatic bag discharge
- Product supply bin and transition hopper

## Technical Specifications & Utilitiest

- Bag Capacity: 22 - 110 lb (10-50 kg)
- Rate: 2 to 8 - 50 lb (25 kg) bags a minute
- Compressed Air: 1.5 cu ft @ 80 psig per bag packed
- Low Pressure Air: 150 scfm @ 6 psig from dedicated blower
- Dust Collection: 400 scfm recommended
- Filling Tubes: Custom designed for 3" - 8" (7.6 - 20.3 cm) valves
- Electrical Requirements: 115 VAC, 1 ph, 60 Hz, 15 amps (avg. consumption 2.5 amps). An isolated power source is recommended.
- Shipping Weight: 2000 lbs.
